

# AnviLatch™

**A**nviLatch, the latest modern anvil cover mounting technology from Dicar eliminates the hassle of mallet mounting your anvil covers. Simply place the AnviLatch device on the die drum and position the safety guard...

Place the lead edge of the cover in the mounting slot... Rotate the drum and cylinder... and AnviLatch secures the cover lock-up without the use of a mallet or hammer. It's simply, safe and fast.

## FEATURES:

- Available for all popular rotary die drum sizes
- Eliminates the need for mallets or hammers
- Safety guard protects operator from nip
- Includes Gripper Bars for easy drum rotation
- Mounts in minutes
